Timekeeping Project News (January 2016)

January 25, 2016

The Electronic Timekeeping project team is focused on a number of activities in January 2016:

- Evaluating the new features and bug fixes in Service Pack 7.09.
- Evaluating the benefits of upgrading to Kronos Version 8 concurrent with UCPath integration.
- Researching options for standard and consistent timekeeping practices, processes, and procedures with input from the Electronic Timekeeping Solutions Committee, the Kronos Academic/Research Advisory Committee, the UCPath/Electronic Timekeeping Steering Committee, and Audit & Advisory Services.
- Working with the Steering Committee and Sponsors on options for introducing simplified timekeeping functions within Kronos.
- Planning for the further deployment of Electronic Timekeeping in 22 departments that are using the solution on a limited basis and 65 departments that are not using it.
