Re: ETS Annual Report 2017-2018

It gives me great pleasure to share the Enterprise Technology Services (ETS) Annual Report for FY 2017-2018 at http://cio.ucsb.edu/about/annual.reports/.

Over the past year, the team's efforts focused on critical operational advancements to meet UCSB's growing demand for modern technology. With these improvements, ETS worked to progress UCSB's high level of academics by bolstering campus-wide connectivity, promoting productivity, and ensuring security.

During the 2017-2018 fiscal year, ETS finalized the transformative UC Path implementation, joining other UC campuses by migrating to the centralized payroll system which includes timekeeping, academic personnel, and human resources. Additionally, we migrated 40,043 student accounts to Connect Google's G Suite for Education. This project provides students with unlimited cloud storage and access to core Google apps, enhancing productivity and collaboration.

ETS takes great pride in contributing to UCSB's mission of research, teaching, and community service. We look forward to continuing our legacy of serving the campus in the new year.

Sincerely,

Matthew Hall
